\*\*\* 2020-2021 FIGURES ABOVE ARE PRELIMINARY \*\*\* | \*\*\* ANALYSIS BELOW IS PRELIMINARY \*\*\*

There are a few things to note about the enrollment data in this document. All of the 2020-2021 data is preliminary and will likely differ from what your county's enrollment is today. Please note that enrollment means different things to different people, especially when it comes to determining funding. For the purposes of the data we are looking at today, it is a "snapshot" of students enrolled and receiving educational services at a public school as of the first Monday in October, or who has been identified as enrolled in a private school or receiving home school instruction. That said, we typically don't finalize enrollments until the end of the calendar year so this data should be considered preliminary and possibly subject to change.

Public school enrollment is 146,432 this year, which is down by 1.84% (2,749) and below last year's public school enrollment of 149,181. That decline is the second largest by percentage over the last 30 years. The 2001-02 school year saw a larger percentage and number drop (1.89% lower and 2928 fewer students than the 2000-01 school year) and was part of a 15 year decline in public school enrollment, from 165,507 students in 1995-96 to 141,693 in 2010-11. Public school enrollments had been increasing every year since 2011-12 by about .57% until this year.

The percentage of non-public enrollments as a percentage of the total enrollments has been slowly increasing over the last 30 years, hitting a high of 8.66% in the 2016-17 school year. This year it is at 10.66%. While private enrollments as percentage of all enrollments have fluctuated between 4-6% over the last 30 years, home school enrollments have been steadily and slowly growing during that period. 2020 is the first year that there are more students identified as home school student than enrolled in private schools in Montana, 9,868 vs. 7,600.

Despite the losses in public and private school enrollments, the overall total student population in Montana inched up by .65%, continuing the growth trend in the overall student population that began in 2010-2011.
