End of Year Career & Technical Education (CTE) Collection

2020-2021

AIM User Guide

The End of Year Career and Technical Education (CTE) Collection identifies all grades 9-12 high school students who have completed (or will complete) at least 2 credits, 4 semesters, or more of CTE coursework in an approved Montana Pathway. This data is collected as part of a district's [Carl Perkins](#) grant and federal reporting requirements.

Note: CTE credits may have been earned at another high school in Montana. It may be necessary to review transcripts for prior coursework.

Before beginning this process please review these items that are new this year:

1. Which students do I need to enter data for?

Students are identified as CTE Concentrators in the spring for any students in grades 9-12. Students must have completed (or will complete) at least 2 credits, 4 semesters, or more of CTE coursework in an approved Montana Pathway.

2. Is Concentration Area required?

No. Concentration Area has changed to the Montana Career Pathways. **Starting this year, the field called Area of Concentration is no longer needed. This will be replaced with a new field called MT Career Pathways. All districts will be able to identify the new MT Career Pathways (instead of former areas of concentration) via the new Perkins Spring MT Career Pathways template.**

3. How do I identify MT Career pathways?

After identifying the CTE concentrator students in Infinite Campus, **all districts** will need to extract their CTE concentrator data from Infinite Campus and copy it into a new 'Perkins MT Career Pathways' template. All districts will use this template to mark each student's Career Pathway(s). Then all districts will send this completed template (containing their CTE concentrators marked with their career pathways) using the secure MT [ePASS](#) system to Ian Beagles at the OPI. The links to the interim CTE user guide for 2019-20 and the new Perkins Spring MT Career Pathways template for all districts are below.
