

GTCC Summer Institute 2018

Workshop 1805	
TITLE:	<i>Growing Natural Food in a Change Climate</i>
DESCRIPTION:	Improving soils with growing practices, to assure a healthier future for all. Hands on learning experiences, who, how, when, where, and why about food producing plants in a warming planet. Viewing examples by touring gardens, greenhouses, and permaculture gardens in the Hinsdale and Saco area. Expect to learn with hands in the soil, how to grow food in a change climate, understanding & caring for the microbes, creating resistant soils, plant selection, seed saving, water conservation, and growing healthier foods by working with nature. Crossing cores in agriculture, environment science, soil science, social studies, math, and history.
