

Course of Study

The course of study is guided by the measurable postsecondary goals. If the student wants to go to college, the course of study will contain a lot of academic courses to prepare the students for college. If the student wants to be a mechanic, it is going to have a lot of industrial arts courses. If the student wants to be a chef, the student will be taking a lot of consumer arts classes. While some students may require more life skills courses to assist them in preparing for what awaits them after graduation.

The course of study needs to be the duration of the IEP. Which may usually be three semesters.

The course of study is a projected idea of what the student’s semester may look like through the IEP year. It is important to remember it should follow or align with the measurable postsecondary goals. If you use the term “elective” try to be specific as to what type of elective the student will be taking, i.e., auto shop, art, home economics, chemistry, etc.
