

CHART OF ACCOUNTS

3-0100.00 INTRODUCTION

3-0100.10 INTRODUCTION

The following chart of accounts and definitions are essentially the same chart of accounts and definitions presented in the Accounting and Reporting System Design Manual issued by the Local Government Services Division in 1982. The chart of accounts and definitions continue to be in substantial conformity to those provided in Financial Accounting for Local and State School Systems ("2R²") published by the National Center for Education Statistics of the U.S. Department of Education.

3-0100.20 FUND ACCOUNTING SYSTEM

Legal and accounting requirements of school districts make it necessary to establish a number of separate accounting entities. This is accomplished by organizing and operating a school district accounting system on a fund basis.

A fund is defined as a fiscal and accounting entity with a self-balancing set of asset, liability, fund equity, revenue, and expenditure accounts to record the flow of cash and other financial resources for a specific purpose or activity. Each fund must be accounted for separately so that its resources, obligations, revenues and expenditures or expenses, and fund equities are segregated from other funds. Funds are properly segregated when the accounts are kept separate and the resources of one fund are not used to meet the obligations of another without proper authorization and recording of interfund transactions.

3-0100.30 TYPES OF FUNDS

The funds required by law and sound administration should be included within the following account group categories:

1. Governmental Fund Types

- A. **General Fund.** This fund is the chief operating fund of the school district. It is used to account for all financial resources of the school district except for those required to be accounted for in another fund. A district may have only one general fund.
- B. **Special Revenue Funds.** These funds are used to account for the proceeds of specific revenue sources (other than trusts or major capital projects) that are legally restricted to expenditure for specified purposes. Some examples of special revenue funds are:
 - restricted state or federal grants-in-aid and
 - restricted tax levies

In some cases, a separate fund is used for each identified restricted source. In other cases, one fund is used, supplemented by the classification Project Reporter Code.

CHART OF ACCOUNTS

3-0100.30 TYPES OF FUNDS (cont'd)

- C. **Capital Projects Funds.** These funds are used to account for financial resources to be used to acquire or construct major capital facilities (other than those of Proprietary funds and trust funds). The most common source of capital projects funding is the sale of bonds or other capital financing instruments. Multiple capital projects are identified in a single fund using the classification Project Reporter Code.
- D. **Debt Service Fund.** This fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal and interest on bonds and SIDs.
- E. **Permanent Fund.** This fund is used to account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the school district's programs. These are sometimes referred to as non-expendable endowments.

2. Proprietary Fund Types

- F. **Enterprise Funds.** These funds may be used to account for any activity for which a fee is charged to external users for goods and services. Enterprise funds are required to be used to account for an activity whose principal revenue sources meet any of the following criteria:

- Legal requirement to recover costs through fees and charges
- Policy decision of the governing board of management to recover the costs of providing services through fees or charges

Some examples of typical enterprise activities are day care or preschool services, the bookstore operation, the athletic stadium, or the community swimming pool.

- G. **Internal Service Funds.** These funds may be used to account for any activity within the school district that provides goods or services to other funds, departments, component units, or other governments on a cost-reimbursement basis. The use of an internal service fund is appropriate only for activities in which the school district is the predominant participant in the activity. Otherwise, the activity should be reported as an enterprise fund. Examples of internal service funds are such activities as central warehousing and purchasing, central data processing, and central printing and duplicating.

CHART OF ACCOUNTS

3-0100.30 TYPES OF FUNDS (cont'd)

3. Fiduciary Fund Types

H. **Trust Funds.** These funds are used to account for assets held by a school district in a trustee capacity for others (e.g. members and beneficiaries of pension plans, external investment pools, or other trust arrangements) and therefore cannot be used to support the school district's own programs. Trust funds are generally accounted for on the economic resources measurement focus and the accrual basis of accounting (except for the recognition of certain liabilities of defined benefit pension plans and certain post-employment health care plans; refer to GASB 43 and 45 for guidance on the recognition of these liabilities). Trust funds include pension trust funds, investment trust funds, and private-purpose trust funds (as described below).

- **Pension Trust Funds.** These funds are used to account for resources that are required to be held in trust for members and beneficiaries of defined benefit pension plans, defined contribution plans, other post-employment benefit plans, or other benefit plans. Typically, these funds are used to account for local pension and other employee benefit funds that are provided by a school district in lieu of or in addition to any state retirement system.

- **Investment Trust Funds.** These funds are used to account for the external portion (i.e., the portion that does not belong to the school district) of investment pools operated by the school district.

- **Private-Purpose Trust Funds.** These funds are used to account for other trust arrangements under which the principal and income benefit individuals, private organizations, or other governments.

I. **Agency Funds.** These funds are used for money that is held in a custodial capacity by a school district for individuals, private organizations, or other governments.

Account Groups. Prior to FY2004, there were two accounts groups which were used to establish accounting control and accountability for the school district's general fixed assets and the unmatured principal of the general long-term debt. These account groups are the General Fixed Asset Account Group (GFAAG) and the General Long-Term Debt Account Group (GLTDAG).

These account groups were replaced in FY2004 with two schedules:

Schedule of Changes in Fixed Assets (SCFA)

Schedule of Changes in Long-Term Liabilities (SCLTL)

CHART OF ACCOUNTS

3-0100.40 NUMBER OF FUNDS

Funds may be established as authorized by law or as approved by the Office of Public Instruction as provided in Administrative Rule 10.10.406. Since financial administration becomes more complex and rigid with each additional fund, it is desirable to have as few funds as legal and sound administrative requirements make possible.

3-0100.50 BUDGETED AND NONBUDGETED FUNDS

Section 20-9-201, MCA provides that a formal budget be adopted for the following "budgeted funds" in order to expend any money from these eleven funds:

01	General Fund
10	Transportation Fund
11	Bus Depreciation Reserve Fund
13	Tuition Fund
14	Retirement Fund
17	Adult Education Fund
19	Nonoperating Fund
28	Technology Fund
29	Flexibility Fund
50	Debt Service Fund
61	Building Reserve Fund

All other funds are classified as "nonbudgeted funds." Section 20-9-210, MCA, limits expenditures from these funds to the amount of cash balance in a fund.

3-0100.60 ACCOUNTING POLICIES AND PROCEDURES

Accounting methods are found in Topic 5 Accounting Policies and Procedures.

3-0200.00 SCHOOL FUND CLASSIFICATION AND DEFINITIONS

3-0200.10 SCHOOL FUND ACCOUNT STRUCTURE

The fund account structure consists of a three digit number. The first digit designates whether the fund is used in a (1) elementary district, (2) high school & K-12 district, or (3) special education cooperative. The first digit is also referred to as "level." The next two digits identify the fund.

Fund Number Account Structure:

X X X

District Fund

Each fund number must be preceded by a digit as follows to designate an elementary or high school/K-12 district or a special education cooperative.

1XX - elementary district (e.g. 101 Elementary General Fund)

2XX - high school/K-12 district (e.g. 211 High School Bus Depreciation Fund)

3XX - special education cooperative (e.g. 382 Special Education Cooperative Fund)

ACCOUNT STRUCTURE FOR BALANCE SHEET ACCOUNTS, REVENUE ACCOUNTS AND EXPENDITURE ACCOUNTS

3-0300.10 ACCOUNT DEFINITION

An account is defined as a descriptive heading under which are recorded financial transactions that are similar in terms of a given frame of reference, such as purpose, object, or source. The classification and structure of accounts are the framework around which an accounting and reporting system is developed. The test for adequacy of an account structure is, "Does it provide the information necessary for administrative decision making and reporting purposes?"

Balance sheet accounts, consisting of assets, liabilities, and fund equity, are referred to as real accounts and continue from year to year. Revenue and expenditure accounts are referred to as nominal accounts since these accounts accumulate activity for one accounting period only. The phrase "close the books" means that all nominal account balances have been transferred to the fund equity accounts. Nominal accounts always begin the new accounting period with a zero balance. Collectively, balance sheet accounts are referred to as the "general ledger" or "GL." Revenue and expenditure accounts are referred to as the "subsidiary ledger" or "SL."

3-0300.20 NATIONAL ACCOUNT STRUCTURE

The account structure will be a master classification of balance sheet, revenue, and expenditure accounts from which selections can be made for reporting comparable transactions on a uniform basis. In order to facilitate meaningful cost data comparisons with national educational statistics and meet reporting requirements of various federal revenue sources, the account structure will be based on the structure proposed in Financial Accounting for Local and State School Systems, published by the U.S. Department of Education. The structure is flexible and will allow for expansion to meet increased reporting needs as well as unique needs of the individual user.

CHART OF ACCOUNTS

**ACCOUNT STRUCTURE FOR
BALANCE SHEET ACCOUNTS, REVENUE ACCOUNTS AND EXPENDITURE ACCOUNTS**

3-0300.30 BALANCE SHEET ACCOUNT STRUCTURE

The account structure for balance sheet accounts consists of a three digit fund number (see Topic 3-0200.10) and a three digit balance sheet account number (see Topic 3-0400.10).

Balance Sheet Account Structure:

X X X	X X X	X X X
District/Fund	Balance Sheet Account	Project Reporter Code-Optional

Balance sheet accounts are based upon five principal groups, which are:

- (1) Accounts 100 - 200 Assets and Other Debits
- (2) Accounts 400 - 499 Budgeting/Nominal Accounts-Revenue Control
- (3) Accounts 600 - 699 Liabilities, Deferred Revenues, and Other Credits
- (4) Accounts 800 - 899 Budgeting/Nominal Accounts-Expenditure Control
- (5) Accounts 900 - 999 Equity

Within each group, the accounts are arranged in the order in which they normally appear on the balance sheet. The Budgeting/Nominal Accounts-Revenue and Expenditure Control classifications are for interim report purposes only. These accounts are not included with balance sheet accounts on year-end financial statements because they are nominal accounts; that is, they are closed to fund balance at the end of a fiscal period and relate only to that period. Their inclusion on interim financial statements is recommended, however, and so they are included with the balance sheet accounts.

3-0300.40 REVENUE/OTHER FINANCING SOURCES ACCOUNT STRUCTURE

The account structure for revenue and other financing sources accounts consists of a three digit fund number (see Topic 3-0200.10) and a four digit source account (see Topic 3.0500.10). A three digit project reporter is also used for special accounting and reporting purposes for state and federal grants or other special reporting projects (see Topic 3-0600.50).

X X X	X X X X	X X X
District/Fund	Subsidiary Source	Project Reporter

CHART OF ACCOUNTS

ACCOUNT STRUCTURE FOR BALANCE SHEET ACCOUNTS, REVENUE ACCOUNTS AND EXPENDITURE ACCOUNTS

3-0300.40 REVENUE/OTHER FINANCING SOURCES ACCOUNT STRUCTURE (cont'd)

The first digit of the subsidiary source account number designates the first level of reporting for one of the following six broad categories of revenue sources. The next three digits provide additional summary levels within one of the six categories.

Current or Recurring	
1000	- Revenue from Local Sources
2000	- Revenue from County Sources
3000	- Revenue from State Sources
4000	- Revenue from Federal Sources
Non-Current or Non-Recurring	
5000	- Other Financing Sources
6000	- Adjustments to Beginning Fund Balance

3-0300.50 EXPENDITURE/OTHER FINANCING USES ACCOUNT STRUCTURE

The expenditure and other financing uses account structure is the most extensive. It is designed to give the desired informational breakdown of expenditures and other financing uses without being overly cumbersome. As mentioned, the structure is flexible and will allow for expansion to meet increased reporting needs. The account structure includes the following dimensions:

A. Fund	Three digits
B. Operational Unit (Optional)	Two digits
C. Program	Three digits
D. Function	Four digits
E. Object	Three digits
F. Project Reporter	Three digits

X X X	X X	X X X	X X X X	X X X	X X X
Fund	Oper Unit (Optional)	Program	Function	Object	Project Reporter

- A. **Fund** - The fund numbers are described in detail in Topic 3-0200.10.
- B. **Operational Unit** - (optional) is used to denote an instructional center or individual school unit. Individual organization codes are not intended to be used for departments, sections or other cost centers. This level of subdivision can be accomplished using the functional category codes. A district-wide code can be used for those expenditures not applicable to other organization categories. See Topic 3-0600.10.

3-0300.50 EXPENDITURE/OTHER FINANCING USES ACCOUNT STRUCTURE (cont'd)

- C. **Program** - A program is a plan of activities and procedures designed to accomplish a predetermined objective or set of objectives. The program dimension provides the school district the framework to classify expenditures by program for cost determination purposes. See Topic 3-0600.30.
- D. **Function** - refers to the purpose for which an activity or program exists or is used. It includes the area subfunctions, activities, and subactivities performed to accomplish general objectives. Expenditures are classified by function to provide comparability between communities and states and to assist in decision making. See Topic 3-0600.40.
- E. **Object** - refers to the good or service obtained. See Topic 3-0600.50.
- F. **Project Reporter** - The project reporter code permits a school district to accumulate expenditures to meet a variety of specialized reporting requirements at local, state and federal levels. A unique project reporter code should be assigned to the revenue and expenditure accounts used to account for each grant or project. This code permits the user to relate expenditures to a specific revenue source. It is designed specifically for state and federal grants, but may be used to track local projects within a fund. See Topic 3-0600.50.

The following table shows uses for project reporter codes:

001 - 899	To be assigned by districts as needed. For federal grants, OPI recommends using the OPI "money type" as the first two digits to designate the funding source, authority or expenditure purpose. Refer to OPI's Grants Handbook for a list of these money type codes. The third digit may be used to designate a special project or fiscal year.
900 - 909	Reserved
910 - 949	Assigned by OPI for budget amendments under MCA 20-9-161.
950 - 959	Assigned by OPI for budget transfers under MCA 20-9-208.

BALANCE SHEET ACCOUNTS, REVENUE ACCOUNTS AND EXPENDITURE ACCOUNTS**

3-0300.60 ACCOUNT STRUCTURE SUMMARY

The underline type in each account category represents the level of detail that will usually be required for reporting to the Office of Public Instruction on the Trustees Financial Summary (TFS). For example, a school district may use several function codes within 2300 General Administration, e.g. 2314 Election Services, 2315 Audit Services, 2321 Office of the Superintendent Services. The account balances in all of these functions beginning with 23 would be "rolled up" or subtotaled to the 23XX level (X is used here to indicate the level to roll up the account balances) for TFS purposes. Full account information at all levels may be requested for federal quarterly reports or as supplemental information to be attached to the TFS.

The smaller type represents additional informational levels that may be used at the option of the local school district administration.

Each separate block and the "X" in each block represent a summary level for reporting purposes.

3-0500.00 REVENUE AND OTHER FINANCING SOURCES

3-0500.10 REVENUE AND OTHER FINANCING SOURCES ACCOUNTS

Revenue and other financing sources accounts have a normal credit balance and are used to describe all of the financial resources recognized during a fiscal year. These accounts represent the increases in net current assets of governmental type funds and net total assets for proprietary funds.

Revenue subsidiary source accounts are nominal accounts and always begin each fiscal year with a zero balance. During the fiscal year, school districts have the option of recording the total debits and credits in these accounts on a monthly basis to the 402 Revenue and Other Financing Sources Control Account or recording debits and credits directly to each revenue subsidiary source account. When the 402 control account is used, the total of all subsidiary revenue and other financing sources account balances must equal the balance in the 402 control account. This is usually checked on a monthly basis.

At the end of the fiscal year, the subsidiary accounts **or** the 402 Revenue and Other Financing Sources Control Account are transferred (“closed out”) to 970 Unreserved Fund Balance. Revenue and other financing sources accounts appear in the operating statement prepared at the close of the fiscal year.

3-0500.20 REVENUE AND OTHER FINANCING SOURCES ACCOUNT STRUCTURE

The account structure for revenue and other financing sources accounts consists of a three digit fund number (see Topic 3-0200.10) and a four digit source account (see Topic 3.0500.10). A three digit project reporter is also used for special accounting and reporting purposes for state and federal grants or other special reporting projects

(see Topic 3-0600.50).

X X X	X X X X	X X X
District/Fund	Subsidiary Source	Project Reporter

The first digit of the subsidiary source account number designates the first level of reporting for one of the following six broad categories of revenue sources. The next three digits provide additional summary levels within one of the six categories.

- Current or Recurring
- 1000 - Revenue from Local Sources
- 2000 - Revenue from County Sources
- 3000 - Revenue from State Sources
- 4000 - Revenue from Federal Sources

- Non-Current or Non-Recurring
- 5000 - Other Financing Sources
- 6000 - Adjustments to Beginning Fund Balance

3-0500.30 PROJECT REPORTER CODES

The project reporter code permits a school district to accumulate revenues and expenditures to meet a variety of specialized reporting requirements. It is designed specifically for state and federal grants, but may be used for other special reporting purposes. The project reporter code can be configured in any manner to meet individual user needs. It is optional except when expenditures must be reported by funding source such as federal and state grants. Any three digit number may be assigned as project reporter code except that codes in the range 910-999 are reserved for assignment by the Superintendent of Public Instruction. When a project reporter code is used it should be defined on the last page of the Trustees Financial Summary.

Local, State and Federal Grants

A unique project reporter code must be assigned to the revenue and expenditure accounts used to account for each local, state or federal grant. The first two digits may be used to designate a specific funding source, authority, OPI money type, or expenditure purpose and the third digit may be used to designate a specific project or fiscal year. This code permits the user to relate expenditures to a specific revenue source when the same project reporter code is assigned to the expenditure and revenue accounts used to account for a state or federal grant.

For example, the first two digits could be used as follows:

77 - Federal Handicapped IDEA Part B Grant

The third digit could be used to designate the fiscal period.

8 = 2008

9 = 2009

778 => 2008 Federal Handicapped IDEA Part B Grant

Revenue: X15-4560-778

Expenditure: X15-456-1000-112-778

779 => 2009 Federal Handicapped IDEA Part B Grant

Revenue: X15-4560-779

Expenditure: X15-456-1000-112-779

Project Reporter Numbers:

000 - 899 To be assigned by district as needed.

900 - 909 Reserved

910 - 949 Assigned by OPI when a budget amendment is approved. Do not use project reporters 910 - 949 unless assigned by OPI.

950 - 959 Assigned by OPI for cash budget transfers under MCA 20-9-208. Do not use project reporters 950 - 959 unless assigned by OPI.

Special Reporting Purposes

The project reporter code must also be used to track emergency/budget amendment expenditures. OPI will assign a project reporter for each budget amendment. For example:

910 - General Fund Budget Amendment Expenditure: 101-100-1000-112-910

A project reporter code could also be used to meet specialized reporting requirements. For example a district may wish to track special education expenditures by state sources and district sources:

111 - Special Education - State Sources
Expenditure: 101-280-1000-610-111

112 - Special Education - District sources
Expenditure: 101-280-1000-610-112

Other Financing Sources.

5110 **Sale of Bonds.** Proceeds from the sale of bonds other than refunding bonds are deposited to the Building Fund (60). Premium on bonds sold is that portion of the sale price of bonds in excess of their par value. The premium represents an adjustment of the interest rate. In the absence of legal authority to include bond premium with the bond proceeds, premium on bonds sold should be credited to the Debt Service Fund (50) and recorded as 1900 Miscellaneous Revenue. Accrued interest paid by the bondholder at the time the bonds are sold should be deposited to the Debt Service Fund (50) and recorded using balance sheet account 656 Accrued Interest Payable. This interest should be returned to the bondholder when the first interest payment is made. See sections 20-9-401, 20-9-435, MCA.

5120 **Proceeds from Refunding Bonds.** Proceeds from refunding bonds are deposited to the Debt Service Fund (50). See sections 20-9-401, 20-9-412, 20-9-435, MCA.

5300	Operating Transfers from Other Funds. Used to record the receipt of the operating transfer from the General Fund (01) to the Compensated Absences Fund (21), or from the General Fund (01) to the Litigation Reserve Fund (27) also use this account for transfers to the Debt Service Fund (50) from the Impact Aid Fund (26). (Residual equity transfers to close old funds are recorded using revenue account 9710.) Transfers to correct current period errors in recording revenues or expenditures are known as reimbursements and should be recorded using appropriate accounts affected by the error. See Topic 5-0500. Other transfers are not authorized by law. ("208" Transfers should be recorded using revenue source 9710. See Section 20-9-208, MCA.) Use source 5300 in conjunction with expenditure XXX-999-6100-910 to record transfers between the Compensated Absences Liability Fund (21) or the Litigation Reserve Fund (27) and the General Fund (01).
5400	Proceeds from Long-Term Liabilities. Proceeds from long-term notes made with the Board of Investments as provided by Section 20-9-471, MCA or long-term notes sold in anticipation of federal or state revenue as provided in Section 7-7-109, MCA. Proceeds from capital leases should be recorded using balance sheet account 490 Non-Budgeted Revenues - GAAP Purposes. Proceeds from short-term notes made with the Board of Investments are recorded using balance sheet account 650 Notes or Loans Payable - Current and are not recorded as revenue or as other financing sources.
5500	Reserved.
5600	Reserved.

When preparing GAAP financial statements, accounts 5700 and 5710 may be classified to local, state or federal revenues, as appropriate. OPI uses these accounts from the Trustees' Report to eliminate duplicate reporting of revenue on a statewide basis.

5700 **Resources Transferred from Other School Districts or Cooperatives.** Used to record lump sum payments (other than for local/state special education) received from another school district or cooperative. Examples of such transfers are lump sum contributions to a host district for a prorated share of a particular program budget. This also includes payments between school districts and cooperatives for grants, including payments relating to each participant's share of IDEA Part B federal funds. The receiving district must identify the original source of money on the records using project reporters. See expenditure definitions for function 6200 and object codes 920 and 930.

General Fund Revenue from special education allowable cost services provided other school districts or cooperatives (other than for tuition and transportation services) should be recorded using revenue source 5710. See 20-7-431, MCA. Also see 5710 Special Education Resources Transferred from other School Districts or Cooperatives. Payments from other school districts or cooperatives for specific services provided beyond the interlocal agreement should be coded to 1950 Services Provided to Other School Districts or Cooperatives. Use revenue source 1950 if a payment is for specific services.

0500.40 DEFINITIONS OF OPERATING STATEMENT REVENUE ACCOUNTS (cont'd)

Code	Definition
5710	Special Education Resources Transferred from Other School Districts or Cooperatives. Used to record lump sum payments received from another school district or cooperative for the provision of special education services. This revenue code is reserved exclusively for state, district and cooperative transfers from the general fund for the provision of special education services that are allowable under 20-7-431, MCA. Examples of such transfers include lump sum contributions to a (1) cooperative for the match of the related services block grant; and (2) district for a prorated share of the allowable cost of a special education program. When used in fund 15 for resource transfers allowed under ARM 10.16.3815, the expenditures coded with the same project reporter are counted towards maintenance or effort for the IDEA grant.

This revenue source should not be used with the same project reporter as tuition in Fund 15. Since unused 5710 funds need to be returned to the sending district and unused tuition should be receipted (transferred) to the General Fund, these two revenue sources should not be used with same project reporter.

See expenditure definitions for program 280, function 6200, and object codes 920 and 930. See 20-7-431, MCA. Also see 5700 Resources Transferred from other School Districts or Cooperatives. Payments from other school districts or cooperatives for specific services provided beyond the interlocal agreement should be coded to 1950 Services Provided to Other School Districts or Cooperatives. Use revenue source 1950 if a payment is for specific services.

Adjustments to Beginning Fund Balance.

- | | |
|------|---|
| 6100 | Material Prior Period Revenue Adjustments. This account is used to account for unanticipated material adjustments related to a prior period which would distort current year revenues if credited to the current year accounts. Examples would be material canceled warrants, large distribution errors relating to property taxes, state or county equalization adjustments, etc. This account is used for special reporting purposes to show prior period adjustments as adjustments to beginning fund balance on the operating statement. See Topic 5-0280. |
| 9710 | Residual Equity Transfers In. This account is used to record nonrecurring or non-routine transfers of equity between funds, including residual balances of discontinued funds which are transferred to the general fund and transfers allowed under 20-9-208, MCA. See expenditure program code 999, function 9999, and object 971 for recording residual equity transfers out. Total residual equity transfers in (source 9710) for all funds must equal total residual equity transfers out (XXX-999-9999-971) for all funds. |

CHART OF ACCOUNTS

3-0600.00 EXPENDITURE AND OTHER FINANCING USES

3-0600.10 EXPENDITURE AND OTHER FINANCING USES ACCOUNT STRUCTURE

Expenditure and other financing uses accounts have a normal debit balance and are used to describe all of the financial resources used during a fiscal year.

These accounts are nominal accounts and always begin each fiscal year with a zero balance. During the fiscal year, school districts have the option of recording the total debits and credits in these accounts on a monthly basis to the 802 Expenditure and Other Financing Uses Control account. When the 802 control account is used, the total of all subsidiary expenditure and other financing uses account balances must equal the balance in the 802 control account. This is usually checked on a monthly basis.

At the end of the fiscal period, the subsidiary expenditure and other financing uses accounts **or** the 802 Expenditure and Other Financing Uses Control account are transferred (“closed out”) to 970 Unreserved Fund Balance. Expenditure and other financing uses accounts appear in the operating statement prepared at the close of the fiscal year.

The account structure for expenditure and other uses accounts includes the following dimensions:

X X X	X X	X X X	X X X X	X X X	X X X
Fund	Oper Unit (Optional)	Program	Function	Object	Project Reporter

Fund - The fund numbers are described in detail in Section 3-0200.10 of this manual.

Operational Unit Dimension. The operational unit has several common uses for school districts: (1) to identify attendance centers, (2) as a budgetary unit designator, and (3) as a means of segregating costs by building structure. **Title I requires grant expenditures be tracked by building.**

This code is designed to be used primarily at the discretion of the individual school district. Some districts may desire to account for costs by physical structure (building). An example of this is shown below.

- 01 Central Administration Building
- 11 Anderson Elementary
- 12 Ryan Elementary
- 13 Bryant Elementary
- 14 Central Elementary
- 15 Hawthorne Elementary
- 16 Jefferson Elementary

750	Depreciation. The portion of the cost of a fixed asset, except for land, which is charged as an expense during a particular period. In accounting for depreciation, the cost of a fixed asset, less any salvage value, is allocated over the estimated service life of the asset, and each accounting period is charged with a portion of such cost. Through this process, the cost of the asset is ultimately charged off as an expense. Depreciation expense is generally recorded for governmental activities only at year end on the Fixed Asset Schedule of the Trustee's Financial Summary. For fixed assets of Enterprise funds (Funds 70 - 72), depreciation expense should be recorded as an expenditure in the district's accounting records. Land is never depreciated.
780	Major Technology Hardware. Expenditures for computer hardware, monitors, overhead projection devices for computers, computer packages. See object codes 681 and 682 for reporting computer software expenditures.
781	Major Technology Hardware.
782	Major Technology Software.

Only amounts paid as the result of court decisions are recorded here. This object is used only with function 2310.
830	Special Assessments. Expenditures to repay long term debt related to sidewalks, curbs, and storm sewers projects levied against school district property. Special assessments for maintenance fees, such as, street lighting, landfill or garbage services, etc. should be coded to object 440 or any other appropriate object.

------	------------------------------------

Other Uses of Funds. Includes transactions which are not properly recorded as expenditures by the school district, but require budgetary or accounting control. Usually used with governmental type funds or expendable trust funds.

- 910 **Operating Transfers to Other Funds.** Used to account for the operating transfer from the General Fund to Compensated Absence Fund or the General Fund to the Litigation Reserve Fund. In the General Fund, use 910 to record a transfer to the Self Insurance - Health Fund to fund costs of the self insurance fund which exceed the actuarially determined premium. Do not use 910 to record transfers between funds which are quasi-external transactions, reimbursements to correct coding errors, residual equity transfers, or interfund loans here. See Topic 5 for discussion of interfund transfers.

When preparing GAAP financial statements, objects 920, 930 and 940 may be classified under an appropriate function other than 6200. OPI uses these accounts from the Trustees' Report to eliminate duplicate reporting of expenditures on a statewide basis. They are not "Other Financing Uses" as defined by generally accepted accounting principles.

- 920 **Resources Transferred to Other School Districts or Cooperatives.** Used to account for resources recorded as revenue by one district or cooperative, but transferred to another district or cooperative for expenditure. For example, a lump sum payment or contribution to a special education cooperative for a member's prorated share of the cooperative's budget should be recorded using 920. The paying district or cooperative must identify the original source of the money transferred to the receiving district or cooperative. See revenue source 5700 and 5710. Used with function 6200 only.

Contracts for specific services such as graphic arts, data processing, purchasing, and warehousing received from other school districts, rather than private contractors, should be recorded using object code 351. Contracts for services, such as audiologists, speech or physical therapy, provided by cooperatives rather than private contractors, should be recorded using object code 354.

Use 930 for transferring grant money to other districts or cooperatives.

- 930 **Federal or State Grant Resources Transferred to Other School Districts or Cooperatives.** (Use with XXX-___-62XX-930-___) Used to record the transfer of grant money received by one district or cooperative and transferred to another district or cooperative for expenditure. See Topic 5 for a discussion of interdistrict transactions. The paying district or cooperative must identify the original source of the money being transferred by using a project reporter code with the expenditure code for the transfer. See revenue source code 5700. Use with function 6200 only.

Use 920 for transferring non-grant money to other districts or cooperatives.

940	Indirect Costs. Used to record the transfer of indirect cost recoveries or balances under \$10 from grants to the indirect cost pool in Miscellaneous Fund 15. Use with function 6200. (Code using XXX-____-62XX-940-____).
971	Residual Equity Transfers Out. (Use with XXX-999-9999-971) This account is used to record nonrecurring or nonroutine transfers of equity between funds (i.e. residual balances of discontinued funds which are transferred to the general fund.) Used with program 999 and function 9999. See revenue source code 9710 for recording residual equity transfers in. Total residual equity transfers out for all funds must equal total residual equity transfers in for all funds. Section 20-9-208, MCA, transfers must be reported using the OPI-assigned project reporter code.
