

DPHHS or Tribal Agency notifies district and OPI as soon as possible.

OPI updates foster care status in AIM

If the location of the foster care placement results in a potential change in the child's school the child will remain in school of origin until a BID meeting unless it is an emergency placement

If it is determined that it is in the child 's best interest to be moved to a new school:
The new school and DPHHS will develop and implement a plan for transportation.
Interim transportation must be arranged by school district (where foster care student is currently placed) until a permanent transportation plan is in place.

If the child is placed in new school they are enrolled immediately and new school requests records on day of enrollment.
