

# Math Standards Review Team Feedback Meeting Minutes for August 7, 2023

Attending:

Kayla Ryan

Jenny Combs

Marie Judisch

Michelle McCarthy

Main purpose of this meeting was to review the remaining 3-5 grades that did not get finished up August 3, 2023.

<https://docs.google.com/spreadsheets/d/103Ytfq0lpfvNOhCHfi4AOIsAvdVXoh88YO0Wi6gG1c0/edit#gid=1674906146>

Started to finish 3-5 started by reviewing and adding comments into the feedback tab.

IT was decided that the development team would develop the examples. That lead to another decision regarding clarity. Marie’s comments are that you really have to go one by one, because sometimes clarity is sometimes in the verbs, sometimes it is by example. Kayla would like it to be set up like Canada, where there is a short description and you can hover over it and it would pull up more information.

[Crosswalk from](#) Oregon

Marie stated that at the end of this process there will be two documents a short-condensed document and then ARM documents.

Overall feedback for grades 3-5:

Elaborations
- Include visuals often and appropriately
Understand
Elaborations
- Concrete - pictorial - abstract - explicitly lay this out in standards/elaborations so that the conceptual order is in place

Next steps, Marie said she will let the other team member’s review what we have done today.
