Where to Locate the Annual ISP-CEP Snapshot Data in MAPS

Review April 1st ISP Snapshot Data in MAPS (available by 4/3)

The OPI utilizes direct certification data from the OPI-DCA system to provide LEAs with their school(s) ISP calculations. This data serves as a proxy for actual eligibility and may not include all sources of students identified as directly certified as of April 1st. The annual ISP snapshot data will be posted to the current school year's '**Community Eligibility Provision'** form within the SNP Application menu of the MAPS system by April 3rd for districts to review.

Within the MAPS 'Application' menu. Select the '**Community Eligibility Provision'** form.

Then select '**view'** for the data available for the current school year.

The CEP Site Eligibility form displays the current school year's ISP data snapshot captured from the DCA system as of April 1st for the current school year.

If needing to review additional direct certification data, please refer to the DCA snapshot reports, additional documentation within DCA or other documented program sources maintained by the district.

Instructions

The Community Eligibility Provision (CEP) for the National School Lunch Program (NSLP) provides an alternative to household applications for free and reduced price meals for economically disadvantaged students in local educational agencies (LEAs) and schools. Sites that elect this option agree to serve all students free lunches and breakfasts for four (4) successive school years and claim the meals based on a percentage of Identified Students multiplied by a USDA-defined multiplier factor.

Sites which have an Identified Student Percentage (ISP) of 40% or greater are eligible for this option.
Sites which have an Identified Student Percentage (ISP) between 30.00% - 39.99% are potentially eligible.

Enter each Site's Number of Identified Students and Enrollment as of the Reporting Date.
