Indicator 4A: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results Indicator: Rates of suspension and expulsion:

A. Percent of local educational agencies (LEA) that have a significant discrepancy, as defined by the State, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and

B. Percent of LEAs that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of LEAs that meet the State-established n and/or cell size (if applicable) that have a significant discrepancy, as defined by the State, in the rates of suspensions and expulsions for more than 10 days during the school year of children with IEPs) divided by the (# of LEAs in the State that meet the State-established n and/or cell size (if applicable))] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, LEAs that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of LEAs excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2021 SPP/APR, use data from 2020-2021), including data disaggregated by race and ethnicity to determine if significant discrepancies, as defined by the State, are occurring in the rates of long-term suspensions and expulsions (more than 10 days during the school year) of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons:

- -- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- --The rates of suspensions and expulsions for children with IEPs to nondisabled children within the LEAs

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Because the measurement table requires that the data examined for this indicator are lag year data, States should examine the 618 data that was submitted by LEAs that were in operation during the school year before the reporting year. For example, if a State has 100 LEAs operating in the 2020-2021 school year, those 100 LEAs would have reported 618 data in 2021-2022 on the number of children suspended/expelled. If the State then opens 15 new LEAs in 2021-2022, suspension/expulsion data from those 15 new LEAs would not be in the 2020-2021 618 data set, and therefore, those 15 new LEAs should not be included in the denominator of the calculation. States must use the number of LEAs from the year before the reporting year in its calculation for this indicator. For the FFY 2021 SPP/APR submission, States must use the number of LEAs reported in 2020-2021 (which can be found in the FFY 2020 SPP/APR introduction).

Indicator 4A: Provide the actual numbers used in the calculation (based upon districts that met the minimum n and/or cell size requirement, if applicable). If significant discrepancies occurred, describe how the State educational agency reviewed and, if appropriate, revised (or required the affected local educational agency to revise) its policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, to ensure that such policies, procedures, and practices comply with applicable requirements.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the LEA with discrepancies had policies, procedures or practices that contributed to the significant discrepancy, as defined by the State, and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with (OSEP) Memorandum 09-02, dated October 17, 2008.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2021 SPP/APR, the data for FFY 2020), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Targets: Description of Stakeholder Input

Discussions and Stakeholder input of the State's Performance Plan (SPP), Annual Performance Report (APR), State's Systemic Improvement Plan (SSIP), and Results Driven Accountability (RDA)/Results Based Accountability (RBA) began in 2013 with our State Special Education Advisory Panel. The Panel is fully vested and broadly representative of Montana. Additionally, many of the panel members as well as SEA staff serve in other agency or organization leadership positions or on advisory groups in the disability community. This enables MT to draw insight and advice from a broad group of stakeholders with an understanding of Montana's unique needs, strengths, and potential weaknesses.

Other stakeholder groups we sponsor and/or engage include:

- --Our Comprehensive System of Personnel Development (CSPD) includes both regional and state councils that regularly meet to assess APR data and to evaluate professional development priorities and results.
- --The OPI staff has developed productive working relationships with other Montana agencies that serve youth and adults with disabilities. OPI staff participate as members of advisory councils for early childhood, vocational rehabilitation, juvenile justice, developmental disabilities, the state independent living council and the mental health divisions of the DPHHS. These connections have allowed the OPI staff to build strong working relationships with other agencies, which has resulted in multiple collaborative projects that have strengthened the commitments of all involved to working with Montana's youth to facilitate smooth transitions from birth to adulthood.
- --Working with staff from TAESE, the OPI has facilitated the Montana Higher Education Consortium (HEC) for twenty years. The HEC continues to be a part of CSPD and brings together members of faculty from each of the colleges and universities teacher prep programs in Montana. Participation in the consortium is strong and includes faculty members from each of the public and private colleges in Montana. This group has worked to provide greater standardization of the teacher training programs in Montana and has worked together to improve pre-service training programs.
- --The OPI staff is also engaged with the Schools Administrators of Montana (SAM) which include affiliates for Superintendents, Principals, Special Education Administrators, and Information Technology (IT) Directors. This partnership allows us to respond quickly to needs expressed in the field by school staff. We also provide SAM with a grant to help fund the Montana Recruitment Project. This program focuses on recruiting hard to fill positions such as speech/language pathologists, special education teachers, occupational therapists, and school psychologists for our districts throughout Montana.

Annually, the State Education Agency (SEA) brings together representatives from these stakeholder groups for a joint meeting facilitated by TAESE. This meeting gathers over 80 front-line stakeholders together to share up-dates of issues and gather input from a comprehensive representation of the Montana disability community, families and parents of children and students with and without disabilities. For the past seven years, the topic has been Montana's SSIP and activities have been conducted to solicit both general and specific stakeholder input. During the spring 2022 meeting, the state presented on using data within the state for Local Education Agencies (LEAs) to make decisions. This also included how to interpret the APR data.

FFY 2021 SPP/APR Data

Has the state established a minimum n/cell-size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, LEAs that met the State-established n/cell size. Report the number of LEAs excluded from the calculation as a result of the requirement.

400

Number of LEAs that have a significant discrepancy	Number of LEAs that met the State's minimum n/cell size	FFY 2020 Data	FFY 2021 Target	FFY 2021 Data	Status	Slippage
0	0		0.00%		N/A	N/A

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a))

The rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs in each LEA compared to the rates for nondisabled children in the same LEA

State's definition of "significant discrepancy" and methodology

A LEA is determined to have a significant discrepancy if, given a minimum N of 10, it demonstrates a statistical difference in long-term suspension and expulsion rates for students with disabilities when compared to the long-term suspension and expulsion rates for students without disabilities. The statistical test is a one-tail test at the .01 significance level. Montana uses a Z score of 2.33 to determine a statistical difference.

Montana conducted a review of LEA long-term suspension and expulsion rates for students with disabilities to determine if a significant discrepancy occurred within a LEA. This is calculated by comparing the rates of long-term suspensions and expulsions of students with disabilities to the rates of long-term suspension and expulsion rates of nondisabled students within each LEA. Montana uses a test of the difference between proportions as the methodology for identifying significant discrepancy. The minimum N of 10 is applied to the numerator of this equation - that is, if an LEA does not have at least 10 students with disabilities who had a long-term suspension or expulsion, the data is not reviewed for that LEA.

For any districts that do meet the minimum N of 10 and are determined to have a significant discrepancy, a full Policy, Practice Procedure review is completed. If it is determined that the LEA has inappropriate policies, practices, or procedures that led to the discrepancy, the OPI would issue a finding

and work with the LEA to correct the issues, utilizing the OSEP 09-02 memo requirements.

As noted in OSEP's Part B Indicator Measurement Table, data used in the state's examination is from the 2020-2021 school year, resulting in a one-year data lag for this indicator.

Montana did not have any districts that met the minimum "n" for this indicator.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2021 using 2020-2021 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)

Correction of Findings of Noncompliance Identified in FFY 2020

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
0	0	0	0

Correction of Findings of Noncompliance Identified Prior to FFY 2020

Year Findings of Noncompliance Were Identified	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2020 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

4A - Prior FFY Required Actions

None

4A - OSEP Response

In the FFY 2021 SPP/APR the State included none of the State's LEAs in its analysis of rates of suspension and expulsion of greater than 10 days in a school year for children with IEPs. OSEP reminds the State that if the examination for significant discrepancies in the rates of suspensions and expulsions greater than 10 days in a school year for children with IEPs is not occurring in any meaningful way at the LEA level, OSEP may determine that a State's chosen methodology is not reasonably designed to determine if significant discrepancies are occurring in the rate of long-term suspensions and expulsions of children with IEPs.

The State's chosen methodology results in a threshold for measuring significant discrepancy in the rate of long-term suspensions and expulsions of children with IEPs that falls above the median of thresholds used by similarly situated States.

4A - Required Actions

In the FFY 2022 SPP/APR, the State must explain how its methodology is reasonably designed to determine if significant discrepancies are occurring in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs, including how the State's LEAs are being examined for significant discrepancy under the State's chosen methodology; and how the State's threshold for measuring significant discrepancy in the rate of long-term suspensions and expulsions is reasonably designed.
