

Indicator 4B: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Compliance Indicator: Rates of suspension and expulsion:

- A. Percent of local educational agencies (LEA) that have a significant discrepancy, as defined by the State, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of LEAs that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of LEAs that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups that have: (a) a significant discrepancy, as defined by the State, by race or ethnicity, in the rates of suspensions and expulsions of more than 10 days during the school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy, as defined by the State, and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of LEAs in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, LEAs that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of LEAs totally excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2021 SPP/APR, use data from 2020-2021), including data disaggregated by race and ethnicity to determine if significant discrepancies, as defined by the State, are occurring in the rates of long-term suspensions and expulsions (more than 10 days during the school year) of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons:

- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- The rates of suspensions and expulsions for children with IEPs to nondisabled children within the LEAs

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Because the measurement table requires that the data examined for this indicator are lag year data, States should examine the 618 data that was submitted by LEAs that were in operation during the school year before the reporting year. For example, if a State has 100 LEAs operating in the 2020-2021 school year, those 100 LEAs would have reported 618 data in 2020-2021 on the number of children suspended/expelled. If the State then opens 15 new LEAs in 2021-2022, suspension/expulsion data from those 15 new LEAs would not be in the 2020-2021 618 data set, and therefore, those 15 new LEAs should not be included in the denominator of the calculation. States must use the number of LEAs from the year before the reporting year in its calculation for this indicator. For the FFY 2021 SPP/APR submission, States must use the number of LEAs reported in 2020-2021 (which can be found in the FFY 2020 SPP/APR introduction).

Indicator 4B: Provide the following: (a) the number of LEAs that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups that have a significant discrepancy, as defined by the State, by race or ethnicity, in the rates of long-term suspensions and expulsions (more than 10 days during the school year) for children with IEPs; and (b) the number of those LEAs in which policies, procedures or practices contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the LEA with discrepancies had policies, procedures or practices that contributed to the significant discrepancy, as defined by the State, and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with (OSEP) Memorandum 09-02, dated October 17, 2008.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2021 SPP/APR, the data for FFY 2020), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Targets must be 0% for 4B.

FFY 2021 SPP/APR Data

Has the state established a minimum n/cell-size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, LEAs that met the State-established n/cell size. Report the number of LEAs excluded from the calculation as a result of the requirement.

400

Number of LEAs that have a significant discrepancy, by race or ethnicity	Number of those LEAs that have policies, procedure or practices that contribute to the significant discrepancy and do not comply with requirements	Number of LEAs that met the State's minimum n/cell size	FFY 2020 Data	FFY 2021 Target	FFY 2021 Data	Status	Slippage
0	0	0		0%		N/A	N/A

Were all races and ethnicities included in the review?

YES

State's definition of "significant discrepancy" and methodology

A LEA is determined to have a significant discrepancy, by race or ethnicity, if, given a minimum N of 10, it demonstrates a statistical difference in long-term suspension and expulsion rates for students with disabilities when compared to the long-term suspension and expulsion rates for students without disabilities. The statistical test is a one-tail test at the .01 significance level. Montana uses a Z score of 2.33 to determine a statistical difference. This analysis is completed for all required racial/ethnic categories.

Montana conducted a review of LEA long-term suspension and expulsion rates for students with disabilities to determine if a significant discrepancy, by race or ethnicity, occurred within a LEA. To do this, the rates of long-term suspensions and expulsions of students with disabilities are compared to the rates of long-term suspension and expulsion rates of nondisabled students within each LEA. Montana uses a test of the difference between proportions as the methodology for identifying significant discrepancy by race or ethnicity. The minimum N of 10 is applied to the numerator of this equation - that is, if an LEA does not have at least 10 students with disabilities who had a long-term suspension or expulsion, the data is not reviewed for that LEA. For any districts that do meet the minimum N of 10 and are determined to have a significant discrepancy by race or ethnicity, a full Policy, Practice Procedure review is completed. If it is determined that the LEA has inappropriate policies, practices, or procedures that led to the discrepancy by race or ethnicity, the OPI would issue a finding and work with the LEA to correct the issues, utilizing the OSEP 09-02 memo requirements.

As noted in OSEP's Part B Indicator Measurement Table, data used in the state's examination is from the 2020-2021 school year, resulting in a one-year data lag for this indicator.

Montana did not have any districts that met the minimum "n" for this indicator.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2021 using 2020-2021 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)

4B - Prior FFY Required Actions

None

4B - OSEP Response

In the FFY 2021 SPP/APR the State included none of the State’s LEAs in its analysis of rates of suspension and expulsion of greater than 10 days in a school year for children with IEPs. OSEP reminds the State that if the examination for significant discrepancies, by race and ethnicity, in the rates of suspensions and expulsions greater than 10 days in a school year for children with IEPs is not occurring in any meaningful way at the LEA level, OSEP may determine that a State’s chosen methodology is not reasonably designed to determine if significant discrepancies, by race and ethnicity, are occurring in the rate of long-term suspensions and expulsions of children with IEPs.

The State’s chosen methodology results in a threshold for measuring significant discrepancy, by race or ethnicity, in the rate of long-term suspensions and expulsions of children with IEPs that falls above the median of thresholds used by similarly situated States.

4B- Required Actions

In the FFY 2022 SPP/APR, the State must explain how its methodology is reasonably designed to determine if significant discrepancies, by race or ethnicity, are occurring in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs, including how the State’s LEAs are being examined for significant discrepancy under the State’s chosen methodology; and how the State’s threshold for measuring significant discrepancy, by race or ethnicity, in the rate of long-term suspensions and expulsions is reasonably designed.
