CHAPTER 53: Content Standards Revision Timeline and Overview

ARM 10.53.7: Health and Physical Education Content Standards

ARM 10.53.8: Science Content Standards

Rationale:

Using the negotiated rulemaking process involving independent stakeholder groups, Superintendent of Public Instruction, Elsie Arntzen is seeking to revise Chapter 53 Content Standards for Health and Physical Education and Science to align with [20-7-120](#), MCA. In particular, the statute requires notification to parents or guardians when a school will provide human sexuality instruction. Two types of notification are required: annual notification when a student is enrolled in human sexuality instruction and notification pursuant to a school policy no less than 48 hours prior to an event, assembly, or use of materials regarding human sexuality instruction.

As previously addressed in the revision of content standards in 2019, the Superintendent is also seeking to revise program delivery standards: ARM 10.55.1301 and 10.55.1501. The program delivery standards in ARM Chapter 55 outline the common conditions and practices that will be evident in all programs within a school system to ensure that all students have educational opportunity to learn, develop, and demonstrate learning in the content standards and content-specific grade-level or grade-band learning progressions.
