

Critical Quality Educator Shortages

**Identification of Schools and Licensure and Endorsement Areas
Impacted by Critical Quality Educator Shortages
in the 2020-21 School Year**

Report to the Board of Public Education
January 2021

Prepared by
Scott Furois, Operations Research Analyst
Danielle Murphy, School Staffing Project Manager
Ken Bailey, Chief Financial Officer
Montana Office of Public Instruction

Background

Section 20-4-503, MCA directs the Board of Public Education, in consultation with the Office of Public Instruction, to:

- (a) maintain and make publicly available a current list of impacted schools; and
- (b) based on reporting by impacted schools or school districts in which impacted schools are located, identify within each impacted school, critical quality educator shortage areas under [20-4-502\(1\)\(a\)](#).

A *quality educator* is defined as a full-time equivalent educator who holds a valid educator license or is a licensed professional providing services to students in a public school district, an education cooperative, the Montana School for the Deaf and Blind, the Montana Youth Challenge Program, or a state youth correctional facility.¹

The Board of Regents administered the Quality Educator Loan Assistance Program through the Office of the Commissioner of Higher Education from FY 2008 through FY 2017. The program provided direct repayment assistance for the educational loans of eligible quality educators for up to four years. The total annual loan repayment assistance could not exceed \$3,000 per educator. The number of recipients and the amount paid on their behalf were:

<u>Year</u>	<u># of Recipients</u>	<u>\$ Awarded</u>
FY08	104	\$307,280
FY09	116	\$336,366
FY10	163	\$471,754
FY11	143	\$418,023
FY12	167	\$495,924
FY13	191	\$527,761
FY14	207	\$597,966
FY15	172	\$494,794
FY16	172	\$499,066
FY17	157	\$457,935

The 2017 Montana Legislature did not fund the Quality Educator Loan Assistance Program for fiscal years 2018 and 2019. However, HB 211 passed by the 2019 legislature reestablished funding in the amount of \$500,000 per year and substantially changed the program in several ways. In FY20, the OPI paid \$273,070 to lenders on behalf of applicants to the program.

¹ The full definition of a Quality Educator is available at 20-4-501(6), MCA.

The Board of Public Education is required to publish by December an annual report listing the critical quality educator shortage areas under [20-4-502](#)(1)(a) in each impacted school. Statute specifically identifies the criteria for an impacted school and what constitutes a shortage.

Criteria for an Impacted School

The definition of an impacted school, [20-4-502](#)(5), is:

- (a) a special education cooperative;
- (b) the Montana school for the deaf and blind, as described in [20-8-101](#);
- (c) the Montana youth challenge program, as established in [10-1-1401](#);
- (d) a state youth correctional facility, as defined in [41-5-103](#);
- (e) a public school located on an Indian reservation; and
- (f) a public school that, driving at a reasonable speed for the road surface, is located more than 20 minutes from a Montana city with a population greater than 15,000 based on the most recent federal decennial census.

The OPI utilized the State Library's GIS database to calculate the drive time from each of the cities with a population greater than 15,000. As a result, 711 of 848 public schools and cooperatives in Montana meet the criteria to be an impacted school. A listing of impacted schools and a map showing these schools can be found on the OPI [website](#).

Criteria for a Quality Educator Shortage

The definition of a critical quality educator shortage area , [20-4-502](#)(1), is:

- (1) "Critical quality educator shortage area" means a specific licensure or endorsement area in an impacted school in which:
 - (a) in any of the 3 immediate preceding school fiscal years a position was:
 - (i) filled through the procedures set forth in [19-20-732](#) (*employment of retired teachers*), [20-4-106](#)(1)(e) (*Class 5 provisional certificate*), or [20-4-111](#) (*emergency authorization*);
 - (ii) filled from a candidate pool of less than five qualified candidates; or
 - (iii) advertised and remained vacant and unfilled due to a lack of qualified candidates for a period in excess of 30 days; or
 - (b) a vacancy for the current school year was advertised for a period of at least 30 days and the district received less than five applications from qualified candidates.

Note: The italicized phrases above were added for clarity.

Methodology for Identifying Quality Educator Shortage

For each criterion listed above, the OPI used the following data sources to identify critical quality educator shortages:

Employment of Retired Teachers. In order to employ a retired teacher and not impact the teacher's retirement benefits, school districts must file a request with the Teachers Retirement System (TRS). TRS provided the OPI with a report of all the approved requests for the past three years.

Class 5 Provisional Certificate. OPI's MSEIS database contains information on Montana quality educators issued a provisional certificate which includes the endorsement specified. All quality educators issued a certificate for the past three years were matched with current TEAMS data to determine which schools employ these quality educators.

Emergency Authorization. OPI's MSEIS database contains information on Montana quality educators issued an emergency authorization which includes the endorsement specified. All quality educators issued an emergency authorization for the past three years were matched with current TEAMS data to determine which schools employ these quality educators.

Fewer Than 5 Candidates and Remained Vacant 30 days. The OPI collects information on the difficulty schools have in recruiting quality educators in the TEAMS collection that typically is open from September through November. Prior to the TEAMS opening this year, the OPI revised the data input screen to specifically match the wording in the statute. However, the OPI believes that the wording used in the TEAMS collection for the prior two years is close enough to map those results to the new statutory definitions for this initial year.

Current Vacancy for 30 days and Less than Five Applicants. Recruitments conducted up until the TEAMS data collection would be captured by the immediately preceding categories. Should a vacancy occur from this point forward, the school district can apply for an immediate designation of a critical quality educator shortage area. To date, two school districts have applied for this designation for four positions. The applications were denied because the recruitments were not in the current school year.

Critical Quality Educator Shortages Listing

Table 1. Critical Quality Educator Shortages for the 2020-2021 School Year shows the shortages identified and the driver for each shortage. Only impacted schools are included in the report. There are 2,273 combinations of a school district and a shortage area contained in the report. Please note that this does not translate to 1,957 vacancies or even necessarily 2,273 recruitments in rural schools. The data was gathered over recruitments from the past three years so in many cases the vacancy has been filled in some way. In some cases, a school system may be looking for a particular

endorsement for a single teacher for both its elementary and middle grades and report the shortage twice in the TEAMS collection. The table represents the best data available for qualifying applicants for the quality educator loan assistance program.

TABLE 1: Critical Quality Educator Shortages for the 2019-2020 School Year
