The new licensure system Teach Montana is up and running. The biggest change that you will see is that an educator will now be responsible for printing their own license. This means that the OPI will no longer be mailing certificates. An educator can download a copy of their license from Teach Montana and provide that to county superintendents for registration.

The license looks *very* different! In fact, it will look different again once the final stages are complete. The license is one-sided and looks like what I have provided below, you can see the current new license and what the final product should look like in the coming weeks.

Current New license starting 6/1/22:

The State of Montana

1: Professional Teaching

Crystal Tierra Andrews

Final New license (may be a little different but close- still in production) starting 6/28/22:

State of Montana

Educator License

Crystal Tierra Andrews

Crystal Andrews, Director of Educator Licensure at the OPI met with the County Superintendents on June 8th to discuss the changes to the license and what to expect. They are aware of the above information and you should not have any issues getting your license registered. If you should still have any questions, please contact the Licensure Team.

Thank you,
