

To assist in planning and managing instructional time effectively, estimated testing times for each testlet have been provided. These ranges represent the duration, in minutes, that it took for 50% to 80% of students to complete each testlet, based on statewide data collected during the MAST pilot. Many students may complete a testlet more quickly and some students may take longer. These ranges should be considered general guidelines, with flexibility to accommodate individual student needs as necessary. The information presented in these tables aligns with the information available in the scheduler tool.
