

Why Should my Household Confirm our Eligibility for Free/Reduced Price Meals if all Students are Receiving Free Meals through the Seamless Summer Option during school year 2021-22?

- If confirmed, your free or reduced-price benefit (based on the meal application you submitted this year), will carryover the first 30 days of next school year.
- Meal eligibility may be utilized to qualify for future Pandemic-EBT benefits issued to families by MT Dept of Health and Human Services.
- Free and reduced eligibility data helps support your school and community's eligibility in various programs and grant based funding.
- If benefits are not confirmed, state funding for your school district may be reduced.

Important: All students will continue to receive free meals through June 30th no matter the outcome of the confirmation of benefits of your household's school year 2021-22 meal application.
