OCTOBER 2024

REQUIRED CHROME OS UPDATE

Chrome OS version 133 Update

➢ In late January 2025, Google will release Chrome OS version 133.

➢ By default, Google will <u>not</u> allow any kiosk applications to run if they use Native Client code.

➢ Before January 2025, District technology staff have two options to continue using the Chrome OS Secure Browser for the 2024-2025 school year:

OPTION 1
Update Chrome OS devices to Chrome OS Long-Term Support (LTS)

Action <u>must</u> be taken before January 2025

OPTION 2
Allow *Native Client (NaCl)* in the Google Admin Console

What if my Chromebooks are already on Chrome OS Long-Term Support?
<u>No action is required for school year 2024-2025.</u>

OPTION 1: Switch to Chrome OS Long-Term Support (LTS)

➢ Switch Chromebooks to Chrome OS Long-Term Support (LTS).

➢ Chrome OS LTS will ensure devices remain on a stable and supported OS version for the 2024-2025 school year.

➢ For more information on switching to Chrome OS LTS, visit:

https://support.google.com/chrome/a/answer/11333726

OPTION 1
Update Chrome OS devices to Chrome OS Long-Term Support (LTS)

Auto-update settings

Long-term support channel ▼

OPTION 2: Allow Native Client (NaCl) Setting

> If a district chooses not to switch to Chrome OS LTS, applicable technology staff **must update the** *Native Client (NaCl)* **setting** in the Google Admin Console to *'Allow Native Client to run even if it is disabled by default'*.

> For more information on the *Native Client (NaCl)* setting, visit: https://chromeenterprise.google/policies/#NativeClientForceAllowed

OPTION 2
Allow *Native Client (NaCl)* in the Google Admin Console
