

## Plan 5 - Test Training Plan

The primary goal of test training is to ensure the school system has a plan for proper training/certification for school personnel that assist with statewide assessments.

Updated: 6/2024

The System Test Coordinator (STC) is required to have the Test Training Plan on record to ensure the school system has a plan in place for proper training in statewide assessments for any school personnel that may assist with assessments. For the required activities below, formulate the school system evidence used, along with the specific steps taken to ensure these tasks are accomplished on an annual basis. In the description, be specific about the local implementation of these policies and procedures.
