

## Other Health-Related Behaviors and Academic Achievement

Montana Office of Public Instruction • Elsie Arntzen, Superintendent • [www.opi.mt.gov](http://www.opi.mt.gov)

### What is the relationship between other health-related behaviors and academic achievement?

Data presented below from the 2021 Montana Youth Risk Behavior Survey (YRBS) show a negative association between health-related behaviors and academic achievement. This means that students with higher grades are more likely to engage in healthy behaviors than their classmates with lower grades, and students who do not engage in health-related behaviors receive lower grades than their classmates who do engage in health-related behaviors. These associations do not prove causation. Further research is needed to determine whether low grades lead to unhealthy behaviors, unhealthy behaviors lead to low grades, or some other factors lead to both of these problems.

Percentage of high school students who engaged in physical activity-related behaviors, by type of grades earned – Montana Youth Risk Behavior Survey, 2021.

Other Health-Related Behaviors	Percentage of Montana high school students who engaged in each risk behavior, by type of grades mostly earned				Significant Association*
	A's	B's	C's	D's/F's	
Saw a dentist (for a check-up, exam, teeth cleaning, or other dental work) during the past 12 months	83	77	69	61	Yes
Have never seen a dentist in their lifetime	1	1	2	2	Yes
Had ever been told by a doctor or nurse that they had asthma	20	20	20	25	No
Currently have asthma	13	14	13	18	No
Missed one or more days of school because of their asthma during the past 30 days	8	9	13	16	No
Did not usually sleep in their parent's or guardian's home during the past 30 days	2	3	5	6	Yes
Slept away from their parents or guardians during the past 30 days because they were kicked out, ran away, or were abandoned	4	3	4	9	Yes
Used an indoor tanning device during the past 12 months	5	5	8	4	Yes
Received help from a resource teacher, speech therapist, or other special education teacher at school during the past 12 months	10	17	22	17	Yes

The Montana YRBS monitors priority health-risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. It is conducted every 2 years during late winter and provides data representative of high school students in Montana. In 2021, students completing the YRBS were asked, “During the past 12 months, how would you describe your grades in school?” and given seven response options (Mostly A’s, Mostly B’s, Mostly C’s, Mostly D’s, Mostly F’s, None of these grades, and Not sure). In 2021, 46% of students received mostly A’s, 27% received mostly B’s, 15% received mostly C’s, 7% received mostly D’s or F’s, and 5% reported receiving none of these grades or not sure. The YRBS has been administered by the Office of Public Instruction in collaboration with Montana schools since 1991. For more information on the YRBS please visit [www.opi.mt.gov/yrbs](http://www.opi.mt.gov/yrbs).
