Percentage of High School Students Who Had Their First Drink of Alcohol Before Age 13 Years, * by Sex, † Grade, † and Race/Ethnicity, † 2021

*Other than a few sips
†M > F; 9th > 10th, 9th > 11th, 9th > 12th, 10th > 11th, 10th > 12th; H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Had Their First Drink of Alcohol Before Age 13 Years,*
1993-2021†

*Other than a few sips
†Decreased 1993-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.
Percentage of High School Students Who Currently Drank Alcohol,* by Sex,† Grade,† and Race/Ethnicity, 2021

*At least one drink of alcohol, on at least 1 day during the 30 days before the survey
†F > M; 10th > 9th, 11th > 9th, 12th > 9th, 12th > 10th, 12th > 11th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Currently Drank Alcohol,* 1993-2021†

*At least one drink of alcohol, on at least 1 day during the 30 days before the survey

†Decreased 1993-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.
Percentage of High School Students Who Currently Were Binge Drinking,* by Sex, Grade,† and Race/Ethnicity,‡ 2021

Had four or more drinks of alcohol in a row if they were female or five or more drinks of alcohol in a row if they were male, within a couple of hours, on at least 1 day during the 30 days before the survey.

†10th > 9th, 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th; H > B, N > B, W > B (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.
Percentage of High School Students Who Currently Were Binge Drinking,* 2017-2021†

*Had four or more drinks of alcohol in a row if they were female or five or more drinks of alcohol in a row if they were male, within a couple of hours, on at least 1 day during the 30 days before the survey

†No change 2017-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Reported That the Largest Number of Drinks They Had in a Row Was 10 or More,* by Sex,† Grade,† and Race/Ethnicity, 2021

*Within a couple of hours, during the 30 days before the survey
†M > F; 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Reported That the Largest Number of Drinks They Had in a Row Was 10 or More, *2019-2021†

*Within a couple of hours, during the 30 days before the survey
†No change 2019-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]
This graph contains weighted results.
Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them, * by Sex, † Grade, and Race/Ethnicity, ‡ 2021

*During the 30 days before the survey, among students who currently drank alcohol
†F > M; W > N (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Missing bar indicates fewer than 30 students in the subgroup.
This graph contains weighted results.

Montana - YRBS, 2021 - QN44
Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them, * 2007-2021†

*During the 30 days before the survey, among students who currently drank alcohol
†No change 2007-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Reported Vodka or Some Other Type of Liquor As the Type of Alcohol They Drank Most Often,* by Sex, Grade,† and Race/Ethnicity,‡ 2021

*Such as rum, scotch, bourbon, whiskey, or tequila, during the 30 days before the survey, among students who drank alcohol during the past 30 days

†9th > 12th; H > W (Based on t-test analysis, p < 0.05.)

‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 30 students in the subgroup.

This graph contains weighted results.
Percentage of High School Students Who Ever Used Marijuana,* by Sex,† Grade,† and Race/Ethnicity,† 2021

*One or more times during their life
†F > M; 10th > 9th, 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th; H > W, N > H, N > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
