Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5 or More Days, ${ }^{*}$ by Sex, ${ }^{\dagger}$ Grade, ${ }^{\dagger}$ and Race/Ethnicity, ${ }^{\dagger} 2021$

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>11$ th, 9 th $>12$ th, 10 th $>11$ th, 10 th $>12$ th, 11 th $>12$ th; $\mathrm{B}>\mathrm{N}, \mathrm{W}>\mathrm{N}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5

 or More Days,* 2011-2021 ${ }^{\dagger}$
*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger}$ Decreased 2011-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical Activity on at Least 1 Day, ${ }^{\star}$ by Sex, ${ }^{\dagger}$ Grade, ${ }^{\dagger}$ and Race/Ethnicity, 2021

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger} \mathrm{F}>\mathrm{M}$; 10th $>9$ th, 11 th $>9$ th, 12 th $>9$ th, 12th $>10$ th (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical <br> Activity on at Least 1 Day,* 2011-2021 ${ }^{\dagger}$

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger}$ No change 2011-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* by Sex, ${ }^{\dagger}$ Grade, ${ }^{\dagger}$ and Race/Ethnicity, ${ }^{\dagger} 2021$

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>11$ th, 9 th $>12$ th, 10 th $>12$ th; $\mathrm{B}>\mathrm{N}, \mathrm{W}>\mathrm{N}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on

 All 7 Days,* 2011-2021 ${ }^{\dagger}$
*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
${ }^{\dagger}$ Decreased 2011-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Spent 3 or More Hours Per Day on Screen Time,* by Sex, ${ }^{\dagger}$ Grade, and Race/Ethnicity, 2021

*In front of a TV, computer, smart phone, or other electronic device watching shows or videos, playing games, accessing the Internet, or using social media, not counting time spent doing schoolwork, on an average school day
${ }^{\dagger} \mathrm{F}>\mathrm{M}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days, ${ }^{*}$ by Sex, ${ }^{\dagger}$ Grade, ${ }^{\dagger}$ and Race/Ethnicity, ${ }^{\dagger} 2021$

*In an average week when they were in school
${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>$ 10th, 9 th $>11$ th, 9 th $>12$ th, 10 th $>11$ th, 10 th $>12$ th; $B>H, B>N, B>W$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* 1993-2021 ${ }{ }^{+}$

*In an average week when they were in school
${ }^{\dagger}$ Increased, 1993-2005, no change, 2005-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education Classes on All 5
Days, ${ }^{*}$ by Sex, ${ }^{\text {, Grade, }{ }^{\dagger} \text { and Race/Ethnicity, }{ }^{,} 2021, ~}$

*In an average week when they were in school
${ }^{+} \mathrm{M}>\mathrm{F} ; 9$ th $>10$ th, 9 th $>11$ th, 9 th $>12$ th, 10 th $>11$ th, 10 th $>12$ th; $W>N$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,*

 1993-2021 ${ }^{\dagger}$
*In an average week when they were in school
${ }^{\dagger}$ Decreased 1993-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $\mathrm{p}<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Played on at Least One Sports Team,* by Sex, Grade, ${ }^{\dagger}$ and Race/Ethnicity, ${ }^{\dagger} 2021$

*Counting any teams run by their school or community groups, during the 12 months before the survey
t9th $>$ 10th, 9 th $>11$ th, 9 th $>12$ th; $B>H, B>N, W>H$ (Based on t-test analysis, $p<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Played on at Least One Sports Team,* 1999-2021†

*Counting any teams run by their school or community groups, during the 12 months before the survey
${ }^{\dagger}$ No change 1999-2021 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.

Percentage of High School Students Who Had a Concussion from Playing a Sport or Being Physically Active,* by Sex, ${ }^{\dagger}$ Grade, ${ }^{\dagger}$ and Race/Ethnicity, 2021

*One or more times during the 12 months before the survey
${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>11$ th, 9 th $>12$ th, 10 th $>11$ th, 10 th $>12$ th (Based on t -test analysis, $\mathrm{p}<0.05$.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

## Percentage of High School Students Who Had a Concussion from Playing a Sport or Being

 Physically Active,* 2017-2021 ${ }^{\dagger}$
*One or more times during the 12 months before the survey
${ }^{\dagger}$ No change 2017-2021 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]
This graph contains weighted results.
