The Youth Risk Behavior Survey (YRBS) data within this report are shown for the 37 Montana counties with 2021 YRBS data. County data is representative of two or more schools with YRBS results attained through random sampling or census sampling procedures. Additionally, there were 16 counties (Broadwater, Carter, Custer, Daniels, Deer Lodge, Garfield, Golden Valley, Liberty, Meagher, Petroleum, Powder River, Powell, Prairie, Sweet Grass, Wheatland, and Wibaux) with one school and whose data is therefore school-specific; per confidentiality guidelines these data are not reported as county data by the Office of Public Instruction (OPI). There were three counties (Fallon, McCone, and Treasure) in which the high school did not participate in the 2021 YRBS.

In this report you will find each health behavior question asked on the high school questionnaire along with its frequency distributions for each response. The Point of Interest (POI) is displayed in the right-hand column(s) as the percentage of students.

The YRBS is a self-reporting, student survey conducted biennially by the Office of Public Instruction through a cooperative agreement with the U.S. Centers for Disease Control and Prevention. The YRBS was developed in 1990 to monitor health behaviors that contribute markedly to the leading causes of death, disability, and social problems among youth and adults in the United States. Additional Montana YRBS results can be found at www.opi.mt.gov/yrbs.
