11 TEACHING PROGRAMS

WHAT'S NEW?

NEW COURSE OFFERINGS

Individual science majors and minors in Chemistry and Biology are now consolidated to a single Broad-field Science major. Coursework in the program will not only include chemistry and biology, but students will also take courses in physics, earth sciences, and environmental sciences.

PROGRAM SPOTLIGHT

The most unique aspect of the Carroll program is its integration with the rich liberal arts core that all students take at Carroll. This core of general education coursework prepares the person, as well as the education professional. Carroll College lives its motto every day of the school year:

Non scholae, sed vitae.
Not for school, but for life.

STUDENT QUOTE

"The best thing and what makes Carroll's Teacher Education Program unique are the professors. They make this program what it is. I am so blessed to have professors who care so much that they would be willing to do anything to help me succeed. They are willing to work with me where I am at and challenge me to do better. The smaller classes made it easier to build relationships, which we all know as educators is one of, if not, the most important part of teaching. Thank you all for encouraging, challenging, and inspiring me to be a great educator."

-Maija Hadwin, Class of 2020
