WHAT'S NEW? NEW COURSE OFFERINGS

Montana State University-Northern's Department of Education has a collaborative agreement with Great Falls College-MSU. Students at GFC MSU and residents in the Great Falls area now have access to an affordable Bachelor of Science in Education. Through collaboration with GFC-MSU, students can begin Education coursework their third year (junior standing) with live instruction at the GFC campus by faculty who are master teachers. Classes meet after 4 p.m. four evenings a week enabling students to earn a Bachelor's degree in Education in two years without leaving home or their jobs.

PROGRAM SPOTLIGHT

The Department of Education values the positive power of relationships and celebrates diversities. With mentoring by Educating faculty who are master teachers, small classes, and an emphasis on reflective practice, our Education graduates enter schools prepared to build rich and caring learning environments where all students are inspired to learn and achieve success. Our diverse teacher education student population gains experience in small, rural schools and is privileged to work alongside Native American faculty and students.

STUDENT QUOTE

"My instructors were supportive, understanding, and diligent while I attended MSU-Northern. They believed in me and that was important to me; without it, I wouldn't have grown as a student and a teacher."

- Shana Henry
